COMMONWEALTH AGRICULTURAL BUREAUX

The Commonwealth Agricultural Bureaux (CAB) is a co-operative venture established by Commonwealth Governments to provide information and other specialized services for scientists and professional workers in agriculture and related fields. The organization is controlled by an Executive Council composed of nominees of the various Commonwealth Governments, including one for the Dependent Territories. The following pages list the present members of the Executive Council, and Liaison Officers who form the primary link in the member country.

CAB has three main functions: a world agricultural information service, an identification service for entomology, mycology, helminthology and nematology, and a biocontrol service. CAB's information service is based on 46 abstract journals which, taken together, cover the whole of agricultural science and related areas of applied biology, sociology, economics, engineering and medicine. Contemporary world literature in many languages is scanned, and abstracts of significant items are included in the journals. Since 1973 all abstracts have been available in machine-readable form for batch searching and online retrieval. The database contains over 1.6 million records and is increasing by over 12,000 per month. Other publications include technical periodicals, annotated bibliographies, review articles and books. An information retrieval service ensures that individual needs are met, and also supplies photocopies of source papers.

The work of CAB is largely carried out through a number of Institutes and Bureaux, each dealing with a particular aspect of agricultural science. Enquiries on scientific aspects of CAB work should be sent to the Director of the appropriate Bureau. Other enquiries should be sent to the Executive Director at CAB Headquarters, or to Liaison Officers in member countries.

The Commonwealth Bureau of Plant Breeding and Genetics is one of 10 Bureaux and 4 Institutes which together form the Commonwealth Agricultural Bureaux, an organisation sponsored by Commonwealth governments for the dissemination of information on agricultural research.

Plant Breeding Abstracts is a monthly journal prepared by the Bureau and published by the Commonwealth Agricultural Bureaux.

The journal is available at a special rate to subscribers in countries which make a financial contribution to CAB (these are listed on the inside back cover).

Back Numbers

Back volumes of Plant Breeding Abstracts are available and there are discounts up to a maximum of 50% on orders of more than 10 volumes. Microform editions of back volumes are available at 80% of price of paper editions.

Orders and enquiries concerning subscriptions and back numbers should be sent to:

GENERAL INFORMATION

CAB is an international non-profit organization controlled by governments of the British Commonwealth of Nations. Its main function is to provide a world-wide information service in agriculture and forestry, and related areas of applied biology, sociology, economics, engineering and medicine. Two other services are responsible for pest and disease identification, and the application of biocontrol techniques to pest management.

CAB is best known for its abstract journals covering each of the main agricultural disciplines (for full list of titles see back cover). The wide range of other CAB publications includes annotated bibliographies, reviews, authoritative books and reference works, and specialized aids to the management of pests and diseases.

Abstract Journals

The 46 abstract journals, which cover specific agricultural disciplines, specialist crops or products, or particular animals are all derived from the CAB Abstracts database. In 1985 input to the database will amount to approximately 150 000 records prepared from 13 000 serials and many other scientific publications.

Online Searching

The complete database from 1973 is available for online searching via three major online hosts: Lockheed's DIALOG (USA), ESA/IRS (Italy) and DIMDI (GFR). Nearly 1.7 million records currently online can be searched as a complete file or as separate subfiles corresponding to each abstract journal. Online retrieval is a highly cost-effective way of carrying out literature searches, and provides the user with a printout of CAB records on specific subjects. User aids available include the comprehensive CAB Abstracts Online Manual, the CAB Thesaurus and the CAB Serials Checklist.

Magnetic Tapes

The database can be leased on magnetic tape on a calendar year basis. It is available either complete or in sections. Since January 1984, these sections correspond to the separate CAB subfiles, but pre-1984 tapes can only be divided into 15 subject headings. The lease fee, payable in advance, covers the running of up to 100 profiles per year; extra profiles are charged for at the end of the year. Current tapes are delivered monthly, and retrospective tapes as required. Technical data and sample tapes are supplied free of charge.

Retrospective Search Service

CAB staff will carry out online searches of the CAB Abstracts database on request. All requests should be submitted with a detailed description of the search query and a list of likely keywords. Quotations are free. Printout of the selected output is despatched by airmail with 7 days of receiving a firm order.

Current Awareness Service

CAB is also able to supply regular updates of records recently added to the CAB Abstracts database on any topic. A cost estimate and 10 of the latest references on the topic will be provided free on request.

Document Delivery Service

Most original articles abstracted in CAB journals are available as photocopies. Order forms and copyright declarations are printed in each journal or are available in bulk from CAB. Documents may also be ordered online via Lockheed Dialorder or ESA's Primordial.

Training

To help users get best value for money, CAB provides user training and education. There is an annual two-week course entitled 'Information on Agriculture' in Oxford, designed to give information officers and librarians, particularly from developing countries, a sound background in agricultural information practice. In addition, there are many one-day workshops in the USA, Europe and elsewhere, facilities for on-the-job training at the CAB input centres, and tailor-made courses on data preparation for organizations supplying input for the database.

ORDERING INFORMATION

Journals

Subscriptions should be fully paid by 1 December for the volumes to be issued in the following year. Many journals are available at special rates to subscribers in CAB member countries. A subscription provides entitlement to each part plus the annual index. Rates include packing and mailing by air to distant countries wherever the cost can be absorbed. Orders should be sent to the address below.

Back numbers, including microform editions, are available at discounted prices. Further details will be given on request.
